

# NIKE BELT TECHNOLOGY

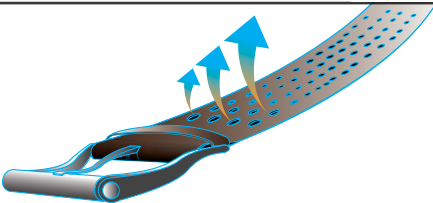

**SHOE MATCHER**

Belt design echoes the leather details of Nike Golf Sport Performance footwear by imitating traditional Nike Golf saddle aesthetics and innovative TW fashion and technology. The Shoe Matcher completes the winning attire on and off the course.

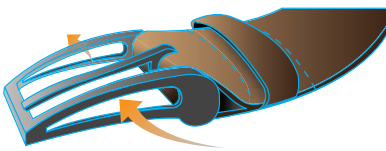

**Nike G-FLEX<sup>®</sup>**

The state-of-the-art fibers twist and turn with every stance for increased range of motion. With Nike G-FLEX<sup>®</sup> technology, there is no holding back, just a full swing ahead.

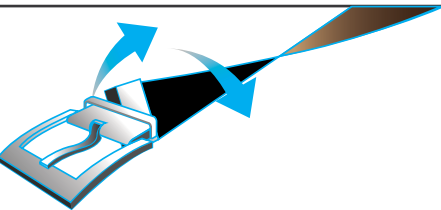

**BREATHABILITY**

Perforated leather strap allows air to move through the belt. Whether it's high noon in mid-August or just a warm day in September, Nike Golf's breathable belts are designed to keep you comfortable through the 18th hole.

**Nike ULTRALIGHT**

Nike Ultralight technology uses sculpted cut-out buckles for a lightweight feel.

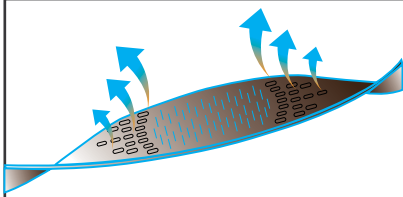

**REVERSIBLE**

Buckle rotates at the base to provide two unique belts for the fashionable golfer. Great for travel.

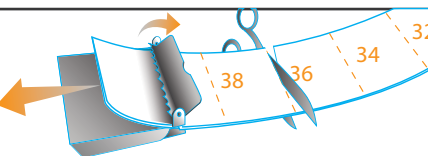

**INTERCHANGEABLE**

Snap-on feature provides buckle and strap versatility for the fashionable golfer.

**Nike BODY MAPPING**

Nike Body Mapping technology uses strategically placed ventilation zones to increase breathability and improve airflow across the body.

**ADJUSTABLE**

Belt webbing may be cut to size for a custom fit.
